

ABV Severe Service Ball Valves

Side entry
Trunnion mounted

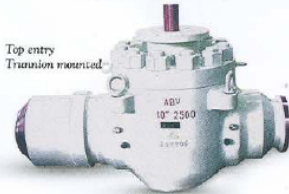

Valve solutions for hydrocarbon requirements

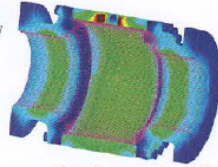

Instrument valve

Top entry
Trunnion mounted

Specialized in the production of side entry and top entry ball valves, for standard and the following services:

- Very high corrosive
- Very high temperature up to 1470°F (800° Celsius)
- High pressure
- Low temperature
- Cryogenic service

Finite Element Analysis (FEA)
and bending calculation

Double Block and Bleed

For sizes from 1/2" to 56" and for classes up to ASME 4500 or API 15000 in standard and exotic materials.

Standard material Duplex, Super Duplex, Inconel® (complete or cladding), Hastelloy®, Titanium and Carbon steel.

Special division for SUBSEA valves and actuators for remote and R.O.V. control up to 2500 meters depth.

ABV is a partner that can guarantee:

- Total quality control according to API Q1 and ISO 9001
- Short delivery program
- After sales service

Three way ball valve
